EDDIE DOUBLE O2

Eddie Double represents the double-sided evolution of the Eddie collection, a floor-standing modular sofa system designed to meet the needs of contemporary, flexible design centered on the dynamic use of space. The frame rests on a thin, upholstered wood base either in leather or fabric with concealed feet that supports a single-volume cushion available in plain or horizontally quilted cover versions. With its clean design and measured proportions, Eddie Double is ideal for central compositions and conversation islands, becoming a true architectural element within open-plan environments, lobbies, lounges or important residential living spaces. The design expresses special attention to detail: the thin base emphasizes the system's horizontality and amplifies its formal lightness, contributing to a measured but distinctive scenic impact.

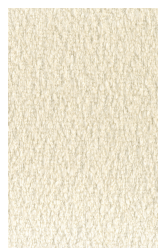

Through our proposals, Eddie Double is presented in a series of double-sided compositional solutions, offering concrete cues for the articulation of space in a fluid, contemporary key oriented towards the relationship between people and environments.
